

Connecting The Bike Network

Cycle Street at 39th and Amazon Drive

Before

Safety

- Wide road with no speed humps, despite being situated next to a park and elementary school
- High speeds on Amazon Drive
- No crosswalk

Mobility

- Doesn't connect to the Amazon Cycle Track
- Doesn't support safe mobility options for children getting to school

After

Safety

- Planters protect pedestrians and cyclists as they cross, and prevent dangerous turns made by cars
- Crosswalk enables safer crossings for students

Mobility

- Acts as an extension to the Amazon Cycle Track, further connecting the bike network
- Bike sharrow and red asphalt inform cyclists that this is a cycling route
