

A Safe & Accessible Street for All

7. Center Island

- Slows cars from all four directions, while crossing the greenway
- Creates greenspace or opportunity for a focal point like a fountain, sculpture or even a small parklet for the neighborhood
- Requires yielding behavior and negotiation between users creating opportunity for social trust-building

8. Greenway Signage

- Marks the space and encourages cyclists to use the route
- Customized signage elements can act as an expression of neighborhood history and identity
- Reminds cars that they will need to share space with all modes of transit
